ABHILASHA SINGH

Bengaluru, Karnataka, India | 8414048425 | abhilashawork22@gmail.com | linkedin.com/in/abhilasha-singh-40401524b

PROFESSIONAL SUMMARY

MCA student (CGPA 9.21) with full-stack web development experience from a Web Developer internship and project work in Next.js, React, Node.js and Python. Exposure to machine learning and deep learning through academic projects. Experience leading a hackathon project team and coordinating technical events across student teams and university management.

EDUCATION

Master of Computer Applications (MCA) Expected Graduation: 2027
Amity University Bengaluru **CGPA: 9.21**

Bachelor of Computer Applications (BCA) **CGPA: 7.6**
Lucknow Public School of Professional Education
Class XII: 76% | Class X: 92%

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Java, C#, JavaScript
Web / Backend: Node.js, Express, Next.js, React
Databases: MySQL, PostgreSQL, MongoDB
AI / Machine Learning: Machine Learning, Deep Learning
Tools / Platforms: Git, Docker, Linux

WORK EXPERIENCE

Web Developer Intern September 2024 – December 2024
Umaga Edutech

- Contributed to frontend and backend development of full-stack websites for educational institution clients.
- Migrated client websites from WordPress to custom PHP-based websites.
- Implemented automatic backend image optimization and smart caching; together with other performance improvements, reduced website loading time by approximately 60% compared with the initial state.
- Gained practical experience in backend systems, performance optimization, website migration and client requirements within a professional development workflow.

PROJECTS

AI-Based Cognitive Gaming and Memory Assistance Platform *Team Lead*
Smart India Hackathon project (prototype) | Kotlin, Android, Next.js, BLE, Geofencing

- Led the project team and coordinated end-to-end development of a prototype assisting elderly dementia patients, combining an Android application, a Next.js backend, BLE-based wearable safety monitoring, geofencing, cognitive games, memory assistance and caregiver-oriented progress monitoring.
- Contributed to system architecture, technical planning and API/data integration; coordinated integration of the Android application, backend, BLE and geofencing components.
- Contributed to cognitive-game and memory-assistance functionality. The team developed a BLE wristband emulator application to develop and test BLE communication and safety features.
- Project was internally selected for the university's Smart India Hackathon process; the team secured 15th position at the university level.

ASL Sign Language Recognition System *Deep Learning Course Project*
Academic prototype | Deep Learning, CNN, RNN

- Developed a prototype ASL sign-language recognition interface using CNN and RNN deep learning models that work together to process sign-language input and predict words.
- Built a basic interface demonstrating the end-to-end prediction pipeline.

QR Code Generator *Python*

- Developed a Python application that generates QR codes from user-provided information, using Python libraries and file handling to automate generation.

LEADERSHIP EXPERIENCE

GDG Lead 2026 – Present
Amity University Bengaluru

- Coordinate technical events and initiatives, and liaise between student teams and university management.
- Coordinate marketing, graphics, certificates, volunteer and other event teams to support smooth event execution.

Founder, Software Developers Club
Lucknow Public School of Professional Education

- Founded and coordinated the club; organized technical events and initiatives.
- Coordinated with multiple student clubs and university management on event planning and execution, and managed communication between stakeholders.
